3D Texture Acoustic PET Felt Panel

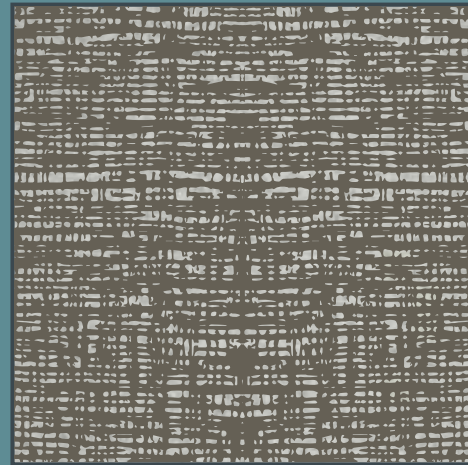

3D Texture Felt Micro Pill and Canvas is a unique acoustic surface solution, born from our deep passion for PET felt and tactile finishes.

By layering two distinct felt surfaces, it creates a refined yet neutral texture-perfectly suited for covering expansive wall areas without overwhelming the space. The reveals a dynamic interplay of color and depth, enhancing the fabric's character and adding a refined level of detail to any environment.

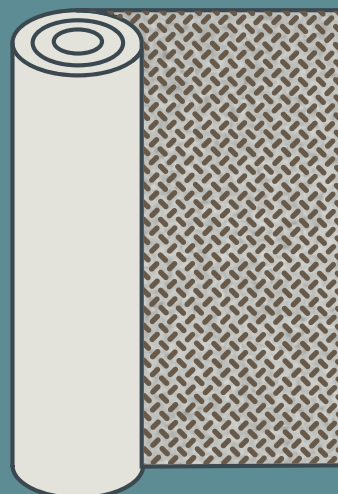

Ideal for design-forward interiors seeking both acoustic comfort and visual sophistication.
