Grid Tiles

Felt Vibe® Acoustic Felt Grid Tiles are drop-in ceiling panels that combine striking design with high-performance sound absorption.

Designed to elevate traditional ceiling systems, these tiles offer dimensional visual appeal while effectively managing noise.

Crafted from acoustically advanced recycled PET felt, each tile features uniquely engineered internal air cavities that enhance sound absorption across a wide frequency range. The result is a decorative yet functional ceiling solution that transforms acoustics and aesthetics alike.

Perfect for offices, educational spaces, hospitality venues, and more, Grid Tiles are the ideal choice for spaces that demand both performance and style.
