Plain Acoustic PET Felt Panels

FeltVibe® provides high-quality acoustic PET felt panels made from recycled plastic bottles. This material is soft to the touch, yet strong and highly durable—offering excellent sound absorption along with versatile design possibilities. PET felt delivers outstanding acoustic performance, making it an ideal solution for wall and ceiling applications aimed at reducing echo and controlling reverberation.

FeltVibe® panels and sheets are impact-resistant and represent a new evolution in pin-up surfaces. By enhancing speech intelligibility, they help transform classrooms and offices into better environments for learning and productivity.
